

STATEMENT OF IMPARTIALITY

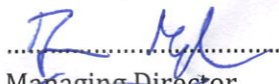

The Sustainable Future Group (SFG) is committed to accurate validation, verification and certification of Greenhouse Gas (GHG) emissions and other environmental information to ensure true results-based sustainability and prides itself on the impartiality, integrity and quality of the same.

SFG understands the importance of impartiality and avoiding potential Conflicts of Interest (COI) when carrying out the third-party validation and verification of Greenhouse Gas (GHG) and other environmental accounting information.

SFG and its employees shall not engage in any activities, including conducting validation and verification of GHGs and other environmental information in accordance with ISO/IEC 17029:2019, ISO 14065:2020 and/or ISO 14064-3:2019 or otherwise, in a manner that will negatively impact our ability to maintain impartiality with respect to outcomes and ensure the integrity of our services.

With specific reference to validation and verification to be conducted as per the aforementioned standards, neither SFG nor its employees will conduct such verification for an entity with whom an existing business or personal relationship might pose a potential COI.

This will be ensured through strict adherence to SFG's impartiality procedures, and other SFG management and quality assurance policies, procedures and internal controls strictly enforced by members of the SFG management team and reinforced through regular staff training.

 Managing Director
 Dr. Ranjiva Munasinghe
 The Sustainable Future Group
